Dear Sirs or Madam;

**RE: CONTINUING REEXAMINATION OF PEARCE US PATENTS 5,749,111 AND 6,026,527**

*This letter is to advise the US patent office that we are interested in continuing the current re-examinations that have been filed with your office by CrossGel LLC on Pearce patents listed above. We understand the defendants CrossGel LLC may have settled litigation brought by Plaintiff Pearce regarding patent infringement of these two patents however we believe these patents to be invalid based on prior art and invention and that Pearce never invented anything related to gelatinous buckling columns.*

*We would like the patent office to continue the current re-examinations of these two patents or we will re-submit them ourselves for re-examination. Pearce and his licensees continue to sue and threaten legal action over infringement of these patents.*

Sincerely,

Craig Alexander  
President
